Profile

Civil Engineer turned Full Stack Developer with expertise in building scalable applications, microservices, and userfocused platforms. Passionate about solving complex problems, optimizing performance, and delivering innovative solutions through modern technologies.

Education

Full Stack Developer | Henry Bootcamp

March 2021 – June 2021 Intensive 800-hour programming course.

Civil Engineer | National Technological University (UTN)

January 2009 – January 2018

Tech Stack

- Lenguajes: JavaScript, TypeScript, Dart, Python, Java, SQL
- Frontend: React, React Native, Flutter, Next.js
- Backend: Node.js, Express, GraphQL, NestJS, Spring Boot, Serverless, Kafka
- Bases de Datos: PostgreSQL, MySQL, SQL Server, MongoDB, Firebase
- Cloud & DevOps: AWS, Docker, Firebase, CI/CD, Datadog, SonarQube
- Herramientas: Cypress, Jest, Puppeteer, Git, Agile (Scrum/Kanban)

Languages

- Spanish: Native
- English: Professional Proficiency
- German & Italian: Basic

Soft Skills

- Time Management & Prioritization
- Team Collaboration
- Problem-Solving & Analytical Thinking

Specialized Skills

- Web Scraping (Automated data collection, saving 20+ manual hours monthly).
- Microservices & Microfrontends Architecture.
- Responsive Design for Web & Mobile Applications.

Professional Experience

Software Engineer | Blue Alba, New York, USA

September 2022 – present

- Collaborated on scalable financial microservices, reducing latency by 35% and boosting load performance.
- Enhanced React interfaces, driving a 25% increase in user engagement.
- Optimized deployments with Docker, reducing time by 50% and improving CI/CD workflows.
- Streamlined data processing with streaming solutions, improving scalability.
- Leveraged AWS (DynamoDB, EC2, S3) for reliable cloud infrastructure.

Software Developer | VFG, Montevideo, Uruguay

October 2021 – September 2022

- Developed a **real estate app** with property listing, filtering, and booking features, increasing user acquisition by 45%.
- Designed an employee scheduling system, reducing absenteeism by 30%.
- Improved app performance with lazy loading and caching, reducing load times by 30%.
- Enhanced state management with Redux and React Query, reducing errors by 60%.
- Achieved 80%+ code coverage with Jest and React Testing Library.

Freelance Developer | Concepción del Uruguay, Argentina

January 2019 – September 2022

- Built inventory systems for small businesses, reducing errors by 75%.
- Developed an e-commerce platform for a local restaurant, increasing online sales by 60%.
- Designed and implemented an e-commerce platform for a party supplies store, boosting online visibility and sales by 50%.
- Created web scraping tools to automate data collection, saving 20+ hours/month.
